

Acme Corp New Hire Onboarding Guide

On day one, new hires complete IT setup, including laptop provisioning, email account creation, and enrollment in multi-factor authentication for VPN and email access.

New hires are assigned an onboarding buddy for their first 30 days to help navigate team processes and answer day-to-day questions.

Benefits enrollment, including health insurance selection, must be completed within the first 30 days of employment through the HR portal.

Managers should schedule a 30-60-90 day check-in cadence to review goals and provide feedback during the new hire's ramp-up period.
