

Acme Corp Information Security Guide

All employees must enable multi-factor authentication on their corporate email and VPN accounts within their first week of employment.

Passwords must be at least 12 characters and rotated every 90 days. Password reuse across the last 5 passwords is prohibited by the identity system.

Company laptops must have full-disk encryption enabled and must not be left unattended in public spaces. Loss or theft must be reported to IT Security within 24 hours.

Sensitive customer data may only be stored in approved systems (the primary database and the designated data warehouse), never in local spreadsheets or personal cloud storage.
